

I'm disgusted at the thought that our business/customers would have to pay taxes that would go to the sole reason we've turned to delivering internet access the way we have. Our ILEC is the most irresponsible operation I've had the pleasure to complain about to the Public Service Commission and State Rep's, and Senators.

Please, I urge you, to consider that this would be like taking money from Chevrolet to keep Toyota alive. Our ILEC is already our biggest problem, I surely can't imagine having to pay them for the services we provide because they can't. Sound's almost like a pyramid scheme.
